

## Editorial

## A FACE LIFT FOR THE JOURNAL

*The Pakistan Heart Journal has been a humble effort by the Pakistan Cardiac Society to establish a forum wherein scientific works of Pakistani researchers could be published, mostly for the benefit of local readership. Due to several reasons, the Journal had been irregular in the past and economic constraints had forced an unattractive presentation.*

*We have, by God's grace, become regular since the past few years. Also, as the economic position of the Journal has improved, it is now possible to give the Journal a face lift. Starting with this issue the Journal will go on offset printing. Also, the format of the papers has been changed to make them more readable.*

*I hope the readers shall better enjoy the Journal and hopefully come forth with a greater support and contributions.*

*Editor*
